SUMMARY

B. Tech CSE student with strong interest in Software Development and Computer Vision, experienced in building real-world projects using Python, OpenCV, React, SQL, and web technologies. Completed an internship at IIT Mandi and developed multiple projects including an OCR-based product quality system and a face recognition attendance system.

INTERNSHIP

IIT MANDI – Data Science Intern (June 2024 – July 2024)

- Worked on a Smart Wheelchair project using EEG-based signals for movement command support.
- Assisted in processing and analysing EEG data using Python for signal-based action mapping.
- Contributed to testing and integration using Muse EEG device (256Hz) and Brainwave sensor setup.

TECHINICAL SKILLS

- **Languages:** C, C++, Java, Python
- **Frontend:** React, HTML, CSS, JavaScript
- **Backend:** PHP, Flask (basic)
- **Database:** SQL
- **Libraries/Tools:** OpenCV, Git/GitHub, VS Code

PROJECTS

Smart Vision Technology: Quality Control in E-Commerce Using OCR (Jan 2025 – May 2025)

- Developed an OCR-based system to extract product details like MRP, MFG, EXP, and Brand Name from images.
- Implemented expiry validation and generated structured output for quality checking.
- Used Python + OpenCV + Tesseract OCR for extraction and processing pipeline.

Face Recognition Attendance System (Nov 2023 – Jan 2024)

- Built a face recognition-based attendance system using Python + OpenCV.
- Implemented real-time face matching and automatic attendance marking with timestamps.
- Stored attendance records in CSV format and managed known user face datasets

Blood Bank Website (May 2024 – Jun 2024)

- Developed a complete blood bank website using HTML, CSS, JavaScript, PHP, SQL.
- Added modules for blood availability, daily camp details, and request handling.
- Created database connectivity and dynamic data management using SQL queries.

Disease Prediction System (Mar 2024 – May 2024)

- Built a disease prediction system using RandomForestClassifier.
- Performed pre-processing and dataset handling for better prediction performance.
- Designed a basic interface to input symptoms and display results.

Gym Website (Dec 2023 – Jan 2024)

- Designed and developed a gym website using React with a clean UI layout.
- Added sections for services, membership plans, and contact details.

EDUCATION

- B. Tech (CSE) – Graphic Era Hill University, Dehradun (2021 – 2025) — CGPA: 7.6
- Class 12 – U.C.M College (2018 – 2020) — 65.5%

ACTIVITIES

- Organized a 3-day Research & Development Workshop covering Machine Learning, Cybersecurity, and emerging technologies in which I Assisted in coordination, planning, and student engagement.
