EXPERIENCE

IIT MANDI - DATA SCIENCE INTERN

June 2024 - July 2024

- Worked on a smart wheelchair that achieved 100% accuracy in detecting eye blinks and jaw clenches to control movement using MNE library in Python.
- Integrated Muse (256Hz) and Brainwave (1000Hz) EEG devices using Python (MNE library) for accurate real-time signal processing.

SKILLS

- **Programming Languages:** C /C++, Java, Python
- **Development:** React, HTML, CSS, JavaScript, PHP
- **Database Management:** SQL

ACADEMIC

Course	University	CGPA/Percentage	Year
B. TECH	Graphic Era Hill University	7.6	2021-2025
12th	U.C.M College (B.S.E.B)	65.5	2018-2020
10th	P.N.P.S	9.2	2018

PROJECTS

Smart Vision Technology: Quality control in e-commerce

Jan 2025 - May 2025

- Built an OCR-based system to extract MRP, MFG, EXP, and brand information from grocery item images.
- Implemented expiry date validation and integrated with a Flutter frontend and Flask backend.

Face Detection

Nov 2023 - Jan 2024

- Created a Python-based real-time face recognition system for attendance, achieving recognition under 500ms.
- Implemented anti-spoofing and integrated with a React frontend.

Disease Detection

March 2024 - May 2024

- Developed a machine learning model using RandomForestClassifier to predict diseases.
- Analysed 10,000+ patient records, optimized feature selection, and improved model performance.

Gym Website

December 2023 - Jan 2023

- Built a React-based website offering gym memberships, personal training info, and class schedules

EVENTS

- Conducted a 3-day workshop on Machine Learning, Cybersecurity and Emerging Technologies.
- Promoted innovation and technical awareness among peers under faculty mentorship.
